

## STUDENT IMMUNIZATIONS

Prior to student admittance to Maggie L. Walker Governor's School the student or the student's parent must submit documentary proof of immunization as required by Va. Code §§ 22.1-271.2 and 32.1-46 to the admitting official of the student's home division. The student's home division will transfer the immunization record to Maggie L. Walker Governor's School as part of the permanent student record prior to admittance.

### Conditional Enrollment

Any student whose immunizations are incomplete may be admitted conditionally if that student provides documentary proof at the time of enrollment of having received at least one dose of the required immunizations accompanied by a schedule for completion of the required doses within 90 calendar days. If the student requires more than two doses of hepatitis B vaccine, the conditional enrollment period will be 180 calendar days.

The immunization record of each student admitted conditionally will be reviewed periodically until the required immunizations have been received.

Any student admitted conditionally who fails to comply with his schedule for completion of the required immunizations will be excluded from school until his immunizations are resumed.

### Exemptions

No certificate of immunization is required for the admission to school of any student if

- the student or the student's parent submits an affidavit to the admitting official stating that the administration of immunizing agents conflicts with the student's religious tenets or practices; or
- the school has written certification from a licensed physician, physician assistant, nurse practitioner, or local health department that one or more of the required immunizations may be detrimental to the student's health, indicating the specific nature and probable duration of the medical condition or circumstance that contraindicates immunization.

### Immunization Record

Maggie L. Walker Governor's School immunization record is a standardized form provided by the State Department of Health, which is a part of the mandatory permanent student record. Such record is open to inspection by officials of the State Department of Health and the local health departments.

The school immunization record is transferred by the school whenever the school transfers any student's permanent academic or scholastic records.
